👤 Profile Summary

Programmer and developer with over 3 years of professional experience in designing and developing WordPress websites, PHP programming, and Laravel and CodeIgniter frameworks. Proficient in modern tools such as Vue.js, Inertia.js, TailwindCSS, and Bootstrap with experience in team management and handling small and large projects.

🎓 Education

Diploma in Mathematics and Physics

Branch: Mathematics

Institute/School: Ghofli

Mashhad, Razavi Khorasan, Iran

2008 - 2020

GPA: 17.4

Bachelor of Computer Engineering

Branch: Software

Institute/University: Tos

Mashhad, Razavi Khorasan, Iran

2020 - Present

GPA: 18

🧰 Work Experience

Trainee - Web Developer

Asap

Mashhad, Razavi Khorasan, Iran

May 2019 - April 2020

Tasks and Achievements

- Support and design the Asap website. Design a Windows application to execute SQL scripts on the database automatically.

Website Developer and Designer

Sepantam Technology Group

Mashhad, Razavi Khorasan, Iran

May 2021 - January 2022

Tasks and Achievements

- Implementation of employer-specific features in projects (price variable based on gold currency, receiving real-time gold and iron prices, along with price change charts and tables, etc.). Designing a WordPress website and creating a custom template.

Web Designer and Team Manager

Behta

Mashhad, Razavi Khorasan, Iran

February 2023 - July 2023

Tasks and Achievements

- Implementing office automation modularly with Ci. Implementation and design of the buying and selling panel along with the management and user panels (4-person team implemented in 3 days). Corporate website design. Proper team management in challenges and deadlines.

Senior Supervisor

Sepidar Group

Mashhad, Razavi Khorasan, Iran

December 2023 - May 2024

Tasks and Achievements

- Senior supervisor of the technical team at Sepidar Group in Mashhad for the development of the most comprehensive customer club platform in Iran. Managing scheduled work, guiding the team, and final review of the team's programming work. Full development of a WordPress plugin to connect the external customer club platform (Laravel) to users' WordPress stores to make full use of the platform's features on WooCommerce. Full development of a Windows application to send print requests and transfer amounts to card readers from the online site to the user's local printer or card reader in the store. By conducting a comprehensive review and analysis of the main product of the company, I was able to identify weaknesses and provide effective solutions for improvement. These actions led to significant product development in terms of performance, scalability, and user experience, and had a significant impact on the company's growth and success.

Website Developer and Designer

Nadine Sadr Arya

Tehran, Iran

November 2021 - April 2023

Tasks and Achievements

- Experience working remotely. Experience working hourly. Designing and implementing various WordPress sites. Developing a supporting WordPress plugin for the company.

Full-Stack Developer

Yasemi

Mashhad, Razavi Khorasan, Iran

August 2024 - January 2025

Tasks and Achievements

- Implementation of AI tools in limited time frames. Training AI models to learn designed tools to assist users. Optimal and extremely intelligent use of Gemini and ChatGPT APIs to automatically receive necessary information and analyses. Creating an intelligent system with Laravel to automatically schedule and execute 50,000 tasks daily.

Heritage Jewelry Gallery (Store)

For: Mr. Ghadeiri

February 2022

Online jewelry store using WordPress with special features: 1- Installment payment 2- Gold box (gold investment) 3- Receiving real-time gold prices in Mashhad along with price fluctuation charts.

Link: https://galleryakhlaghi.com

Amitco (Corporate)

For: Nadine Soft

April 2022

Complete development of the website using WordPress and Elementor page builder, including design of main and single content pages. In this project, custom post types for services, products, departments, and projects were created, and custom fields for each post type were implemented with custom coding. Moreover, templates for displaying all content dynamically using Elementor were designed and executed to ensure flexibility and easy management of the website.

Milestone (Corporate)

For: Nadine Soft

September 2023

Design of the Milestone website using WordPress, completely similar to the target site and adhering to visual and functional details. All sections, including sliders and elements, are implemented meticulously with Elementor. The website pages have been completely redesigned, and custom post types for projects with custom fields were coded. Displaying these contents using dynamic templates and advanced Elementor tools has been optimized and executed.

24Ayare (Store)

For: Mr. Parvaresh

November 2023

Design of a specialized gold and jewelry online store using WordPress, along with adding special features and developing custom plugins including: 1. Partner panel: Capability to authenticate partner users and display special prices to them. 2. Ordinary user panel: Ability to manage wallet balance and make online purchases from the store. 3. Real-time gold price system: Receiving and displaying real-time gold prices in Mashhad, along with price fluctuation graphs for better user analysis. 4. Investment opportunity (Gold box): Implementing a mechanism for users to invest by buying and holding gold in a safe digital space. All these features are designed and implemented to offer a unique and specialized experience to users. This project expired one year after delivery by the employer.

Cryptocurrency Investment

For: SWS DAO

June 2022

Design and development of investment website and user panel with Laravel. Design and development of investment platform using Laravel framework, along with advanced and custom features including: Dedicated cryptocurrency deposit gateway: Implementing a system for receiving and transferring cryptocurrencies securely and quickly. Digital wallet: Capability to deposit, manage balance, and purchase services through the internal wallet. Management of investment packages: Ability to buy packages with specified expiration times for users. Automatic profit calculation: Smart system for calculating users' profits based on purchased packages and automatic deposit into wallets at predetermined times. Withdrawal request system: Ability to register withdrawal requests automatically, activated during the first to third days of each Gregorian month. Despite the platform's successful performance in attracting users, its activity was halted in Khordad 1402 for internal reasons and without prior notice.

Metal Market (Store)

For: Nadine Soft

July 2022

Design of a professional online store using WordPress, including all necessary features for a modern store: Product management system: Ability to add, edit, and manage product categories. Online payment gateway: Connecting to secure gateways for financial transactions. Shopping cart and ordering system: Easy process for users to select and purchase products. Advanced user panel: For managing orders, viewing purchase history, and managing user accounts. Advanced product search: Ability to search and filter products based on various features. Display of real-time metal prices: If needed, the ability to add a system for displaying real-time metal prices. Responsive design: Full compatibility with mobile and tablet devices to provide an optimized user experience across all devices. This store has become a reliable online shopping reference in the metals sector, focusing on delivering fast and reliable services.

CopyTool (Blog Module)

For: Yasemi

October 2024

Laravel project "CopyTool" – a tool for batch extracting and translating articles for publication on WordPress sites. The "CopyTool" project is a comprehensive tool for extracting articles in batches, translating, and synchronizing them for publication on WordPress websites. This tool includes advanced features such as: Text translation: Automatic translation capability and synchronization of articles for different languages. SEO-optimized slugs: Generating optimized and suitable slugs for search engines to improve page ranking. Managing SEO fields (Yoast and Rank Math): Automatically managing and configuring SEO fields for famous SEO tools such as Yoast and Rank Math. Downloading and uploading images: Extracting images from the target site and automatically uploading them to the WordPress site. Image optimization and conversion to WebP: Optimizing images and converting them to WebP format to reduce file size and improve website loading speed. Automated batch operations with scheduling: Simultaneously executing article extraction and publication operations from multiple links with automatic scheduling. Comprehensive reports: Providing detailed reports of each operational stage and system performance separately. Admin panel: Managing all operations and monitoring the status of the system through an advanced management panel. This tool helps users effectively and optimally publish their content on WordPress websites by offering complete features and optimizing the process of extracting and publishing articles.

CopyTool (Store Module)

For: Yasemi

November 2024

Laravel project "CopyTool" – a tool for extracting and translating products for WordPress sites. This tool includes advanced features for extracting and translating products from various sites using automatic and manual feature detection. Key features of this section include: Automatic detection of product elements: Ability to automatically detect and extract all relevant product features from target sites, including product name, description, price, images, features, and other essential information. Manual detection with selector choices: Ability to manually select CSS selectors for accurate product information extraction when automatic detection needs adjustments. Extracting all product features: Comprehensive collection of each product's features from the target site, including text features, prices, images, variable features (such as color and size), and additional specifications. Content translation and synchronization: Automatic translation of all product information into different languages, and synchronization for use on WordPress sites. WooCommerce optimization: Extracted outputs are fully compatible with the WooCommerce structure, ensuring all features are properly loaded in WooCommerce products. Uploading images and optimizing them: Downloading product images from the target site and uploading them to WordPress media, along with optimization and conversion of images to WebP format. Detailed and analytical reports: Accurate reports of each stage of extraction and translation operations, including details about successes and errors in each section. This tool significantly speeds up and enhances the accuracy of the product extraction and translation process, allowing users to easily transfer products to their WooCommerce sites.

Pharmacy Management Plugin

For: Ternam Pharma

November 2024

WordPress plugin for managing pharmacy products – synchronization with Pharma Law. This plugin is specifically designed for managing pharmacy products and orders with WooCommerce, offering synchronization with Pharma Law in both manual and automatic modes. Key features: Synchronizing products with Pharma Law: Automated: Performed once a day in a scheduled batch to prevent site slowdowns. Manual: Synchronization in the product management section with a single click. Synchronization details: Product price: Calculation of unit price based on packaging. Product name: Combination of Persian and English names. Features: Including brand, form, quantity per package, expiration date, and size. Inventory and expiration date: Registering total inventory along with the nearest expiration date. Categorization: Based on product tags in the law. Product identifier: Unique ID (_id) for precise matching. Synchronization of prescriptions and sales invoices: Automatic registration of prescriptions in the law after a successful order on the site. Automatic reduction of inventory by the law. Advantages: Batch scheduling: Reducing server load and preventing slowdowns. Full compatibility with WooCommerce: Easy management of products and orders. User-friendly management panel: Enabling quick synchronization with one click. This plugin is a powerful tool for accurately managing products and orders for online pharmacies.

▦ Soft Skills

Learning and discovering new things is a mental pastime for me; anything that stirs my curiosity is appealing.

I am more interested in deep and independent thinking than teamwork, but when I am in a team, I always present creative ideas and practical solutions, and I have team management experience as well.

I usually don't get bogged down in details unless I know it directly impacts the outcome.

I love designing and building systems that are intelligent and efficient.

I hate routine and repetitive work and am always looking for more optimal methods.

I prefer social interactions to be work-related and sharing ideas rather than lengthy or formal discussions.

I enjoy sharing the new things I have learned with others and helping them, as long as I feel it is valuable.

Change and adapting to situations come naturally and easily to me, as long as the reason is logical.

I dislike predictability in my work; I am always looking for creative and unexpected ways to solve problems.

I love solving complex problems and enjoy looking at an issue from different angles.
